

1. Air1 is the only radio station I listen to throughout the day and it is inspiring to not only myself but everyone around me who listens to it. Air1 is the only station I recommend to parents with children and it is listened to at my child's school during nap time and other times. The effect would be devastating if I and others were unable to listen to Air1 throughout the day. Air1 is in the public interest because it gives the community a station that is broadcast nationwide to listen to without the annoying commercials and also gives listeners a positive station that they can listen to without offending anyone with lyrics or negative d.j.'s. Please keep Air1 alive and running so that I can keep enjoying my day without interruption.
